

## Vision Plan Gets In Motion

Monday, March 5, 9:01 am ET

### **After two grueling months of testing and retuning, the two newly acquired vision machines are up and working.**

STERLING HEIGHTS, Mar. 5 – Accu-Tech, Inc. ([www.accutechmeasurement.com](http://www.accutechmeasurement.com)) is currently up to full capacity again after it has put itself through two months of testing and finishing on its two newly acquired machines.

The machines have both been tested for their mechanical accuracy and have been given the ok to begin checking all sorts of artifacts on them.

The successful completion of putting these machines into service has let Accu-Tech, Inc. come closer to meeting the demand for its services in the vision contract measurement field. For more information please call (586) 323-1181 or email Ed Drozdowski at [ed@accutechmeasurement.com](mailto:ed@accutechmeasurement.com).

About Accu-Tech, Inc.

Accu-Tech, Inc.'s primary objective in business is to provide its customers with the most professional, easy to follow solutions for third-party metrology services. With a focus on the customer's needs, they are able to bring fourth solutions that helps aide to the growth in business. While maximizing their resources to further enhance the business, they will continually improve the level of measurement service for our customers.

They have been in the third-party inspection service for the automotive and aeronautical industries for over ten years. Expanding the business to the medical industry with the purchase of Mycrona Vision Systems has vastly improved their capabilities of measurement. Their inspectors have well over fifty years of combined experience as special machine builders, model and tool builders, fixture builders, and most importantly CMM/vision inspectors.
